Cybersecurity Awareness Month 2022 Report

~1000 participants engaged with the security team through various activities, events, and outreach.

A 300% increase over 2021 engagement

15 sessions offered during Cybersecurity Awareness Month 2022. 9 more offerings than in 2021

Research Security Focused
3 sessions offered
116 total attendees

New Partnership
first-time partnering with the CSU Pueblo campus to create and offer unified CSU System cybersecurity awareness messaging, events, and outreach opportunities, including highlighting our multi-campus cybersecurity internship

15 hours total of cybersecurity games and trivia played with students and the CSU Community on the LSC Plaza and during Festival on the Oval

1st time partnering with the Facilities Management Department to offer a micro-awareness building session

4 sessions offered by Hashdump Student Security Club giving students in-person and hands-on experience with weekly security topics

Each week focused on different protection strategies:
- Week 1: Multi-Factor Authentication
- Week 2: Phishing & Ransomware
- Week 3: Passwords & Password Managers
- Week 4: Software Updates
